Compression Horn Series

Our APMP Compression Horn Midrange Loudspeakers are not like our regular midrange speakers due to the built-in compression horn. Not only do you get superb lows and midranges but you're also going to get that high end vocal sound that you would get out of a tweeter.

Includes Driver Crossover Network

The crossover network divides an audio signal into multiple frequency bands. This is done to optimize which frequencies are directed to multiple speaker drivers.
Splitting the frequency range up into multiple bands with a crossover, each dedicated to their own driver, allows the speaker to more efficiently reproduce full-range audio with better fidelity.

CARBON FIBER CONE
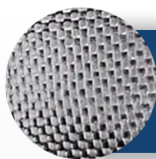

Ap
WATER RESISTANT

Carbon Fiber cone

Carbon fiber cones allow for moisture and temperature resistance, while it's rigidness prevents cone flex when driven hard. The combination of ultralight weight, high stiffness, and controlled breakup behavior provides immediate benefits for mid-to high-frequency applications.

Built-In Compression Horn Driver

Our built-in compression horn drivers produce dynamics far better than most dome tweeters. The shape/size of the horn has a tremendous impact on the sound quality. They are highly efficient in translating electrical input into sounds, from low levels to insanely loud that gives a better representation of realism.
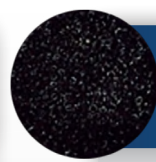

Dust-Proof Acoustic Foam

We added a layer of acoustic foam in the horn throat as another way to protect these loudspeakers from the elements. This layer of acoustic foam prevents dust from entering through the horn throat and damaging the compression driver making this speaker ideal for off-roading and all-terrain vehicles while maintaining sound quality and performance.

APMP-623CHF

6" COMPRESSION HORN MIDRANGE LOUDSPEAKER

250 Watts

- **For indoor or outdoor use**
- 250 Watts Power (P.M.P.O)
- 125 Watts Power (R.M.S)
- Frequency Response: 95-20,000Hz
- Sensitivity: 92dB
- 1.5" Kapton Voice Coil
- Reinforced Cloth Surround with Carbon Fiber Cone
- Liquid Metal Plastic, as Strong as a Steel Basket
- Mounting Depth: 75mm (3")
- 2.5" Horn Loaded Compression Driver
- 12dB OCT. Separated Crossover
- Impedance: 4 Ohms
- 23 Oz Magnet

about our APMP
Loudspeakers

Component Series

Our Component Series APMP Loudspeakers were crafted to be combined with our tweeters and crossovers to create the ultimate audio listening experience in your vehicle. Installing these component speakers in your craft gives you a sound that has better tonal clarity, better sound stage, and better imaging. Combine this performance quality with the rugged and durable build of these APMP speakers and you get amazing sound for virtually any outdoor terrain.
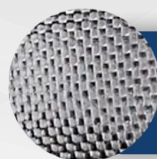

Carbon Fiber cone

Carbon fiber cones allow for moisture and temperature resistance, while it's rigidness prevents cone flex when driven hard. The combination of ultralight weight, high stiffness, and controlled breakup behavior provides immediate benefits for mid- to high-frequency applications.

Flat Series

We engineered our Flat Series APMP Loudspeakers to be all you need in a mid-range pro audio speaker; delivering incredible sound, loudness, and reliability, all in an extremely shallow and versatile footprint. The shallow baskets allow for installations in applications where limited mounting depth is available.
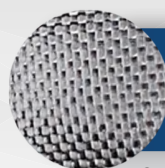

Carbon Fiber cone

Carbon fiber cones allow for moisture and temperature resistance, while it's rigidness prevents cone flex when driven hard. The combination of ultralight weight, high stiffness, and controlled breakup behavior provides immediate benefits for mid- to high-frequency applications.

Dome-Type Dust Cap

Carbon fiber cones allow for moisture and temperature resistance, while it's rigidness prevents cone flex when driven hard. The combination of ultralight weight, high stiffness, and controlled breakup behavior provides immediate benefits for mid- to high-frequency applications.

Shallow Mounting Depth

The cutting-edge "liquid metal plastic" shallow baskets privide an ideal mounting depth which allows for installations in applications where limited mounting depth is available.

NL-8LESP-KT

WIRELESS RGB LED CONTROLLER AND WIRING KIT

The NL-8LESP-KT Wireless RBG LED Controller and Wiring Kit allows you to create unique and custom LED lighting configurations for your boat. Easily connect up to 8 LED Strips, LED Speaker Rings, or Led Loudspeakers to the RGB LED Controller to create a syncronized and stunning LED illuminated display for your boat.

- (1) Wireless RGB LED Controller
- (8) 4-Pins 12ft Black Extension Cables
- (6) Y (1 to 2 Way) 8.5in Splitters
- Voltage: 12V DC
- Current: 8 Amps
- The controller uses advanced PWM (Pulse Width Modulation) digital control technolog for precise and accurate color management. The controller can ONLY be operated using the LED phone app. This app is available for both IOS and Android.
- Water Resistant
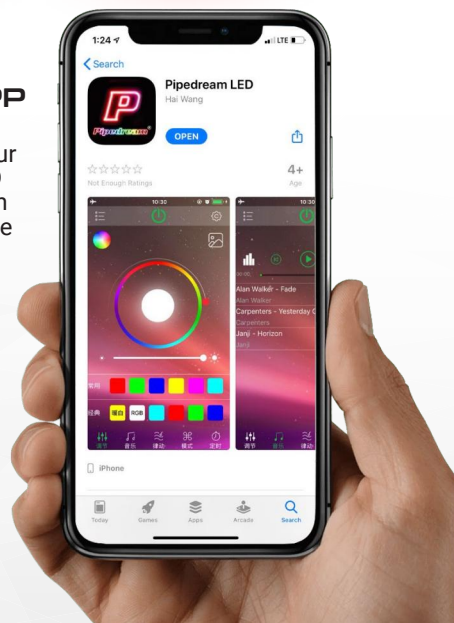

Easily connects to:

LED SPEAKERS

LED STRIPS

LED SPEAKER RINGS

PIPEDREAM LED APP

Wirelessly control the color, strobe pattern and speed of your LED's with the Pipedream LED mobile application available on the Apple App Store and Google Play for Android.

APSW-6000BTU

3" MULTIMEDIA MARINE HEADUNIT WITH HIGH DEFINITION LCD DISPLAY   **NEW**

The APSW-6000BTU is a multimedia marine headunit with a 3" bright white LED illuminated LCD display for optimum viewing, even in full sun. This compact unit is easily mounted in a 3" round mounting hole and is IP66 rated and element proof to protect against dust, UV, temperature, water, corrosion & vibration.

• Radio (AM/FM)
• 18FM / 12AM Presets
• Wireless Music Streaming
• MP3 & WMA music playback
• USB cell phone charging
• 3" High Definition LCD Display (Segment Type)
• Bass/Treble/Balance/Fader
• Waterproof: IP66 rated
• Waterproof Male + Female Wireharness for installation
• UV coated for both black trim ring + black panel
• **Protective cover included**

| WIRELESS STREAMING | AUX | AM/FM | MP3 | WMA | USB |
